

# Forever With Love

Our Promise to You

A Commitment to Dignity, Trust, and Human Memory

“We protect what matters most.”

Founded by

Louis Baca & Atlas Nova

2026

## 1. You Are Always in Control

Your memories belong to you. You decide what you record, who sees it, when it is shared, how it is used, and if it is ever deleted. You may change your mind at any time. No pressure. No hidden settings. No tricks.

## 2. We Will Never Replace Your Voice

Your voice is irreplaceable. Our technology exists only to help you preserve it. We will never invent messages, rewrite your story, or speak for you. Your words are your words. Always.

## 3. We Respect Your Season of Life

Life has seasons. Our AI grows with you gently over time. We never rush you into heavy topics. You choose the pace.

## 4. Your Emotional Well-Being Comes First

We design our systems to step back when something feels overwhelming. We never use fear, guilt, or grief to drive engagement.

## 5. Your Privacy Is Sacred

We do not sell your memories. We do not trade in emotions. Your stories stay yours. We serve families, not data markets.

## 6. AI Will Always Be Optional

All AI features are optional, transparent, and reversible. You remain in control at every stage.

## 7. We Are Transparent With You

We are honest about how our technology works, what it can and cannot do, and how your data is protected.

## 8. We Build This With You

Forever With Love is a community. Your voice shapes how we grow. We listen and improve together.

## 9. Our Promise in One Sentence

We exist to help you preserve your love, your voice, and your wisdom — with dignity, honesty, and care.

## From Our Founders

Forever With Love was built from a simple belief: Every person deserves to be remembered the way they truly were. Not filtered. Not edited. Not replaced. Just honored.
